

**Ms. Chui Ping Lei,
Lecturer, Dept of Nursing Sciences,
Faculty of Medicine, University of Malaya
Speaker for EMPOWERED's 2014
Colorectal Cancer Awareness Day Workshop**

I am extremely grateful that this is the third time for me as a speaker for EMPOWERED's community project. As a healthcare worker, providing education and community services is part and parcel of my job, and it is always in my heart. Therefore, I am more than happy to assume this role in consideration that this kind of community project is the first of its kind in Malaysia.

I am proud to be one of EMPOWERED's partner as it has received tremendous gratitude from the society for its invaluable contribution thereof. As the old saying goes "prevention is better than cure", EMPOWERD has created this awareness to the low-income group. Thumbs up!

Dedicating my service unreservedly to EMPOWERED is a meaningful expression of caring for people. Regarding helping out EMPOWERED in future projects, without any hesitation, the answer is YES!

EMPOWERED's brilliant work has made a difference and kudos to you, EMPOWERED.

Ms. Chui during her presentation on 'EMPOWERED to save lives and support you.'

Ms. Chui and the winners of the first quiz and prize session.
